FOSHAY electric

President's Message

Mark Faucher, President

We would like to take this opportunity to introduce you to Foshay Electric Co., Inc, one of San Diego's largest electrical contractors.

Foshay Electric is more than an electrical contractor. As you read through our Statement of Qualifications, you will find our background and experience includes all phases of the industry. Since 1947, Foshay Electric has become one of the largest and most respected electrical contracting firms throughout Southern California. Our staff of highly trained professionals has been instrumental in developing our proven record of quality performance. Our services include design, engineering, and contracting for new and existing residential, commercial, and industrial projects.

Over our 69-year history, we have developed a prestigious listing of satisfied customers. Our clients are interested in achieving the ultimate building experience and expect our services to suit their needs. As the construction industry becomes more competitive, we are committed to sustain our reputation as a progressive electrical contractor and continue to deliver high quality service. Our Customer Service Department provides successful repairs of all sizes on a 24-hour-a-day emergency basis, along with any electrical installation specifically tailored to meet your needs.

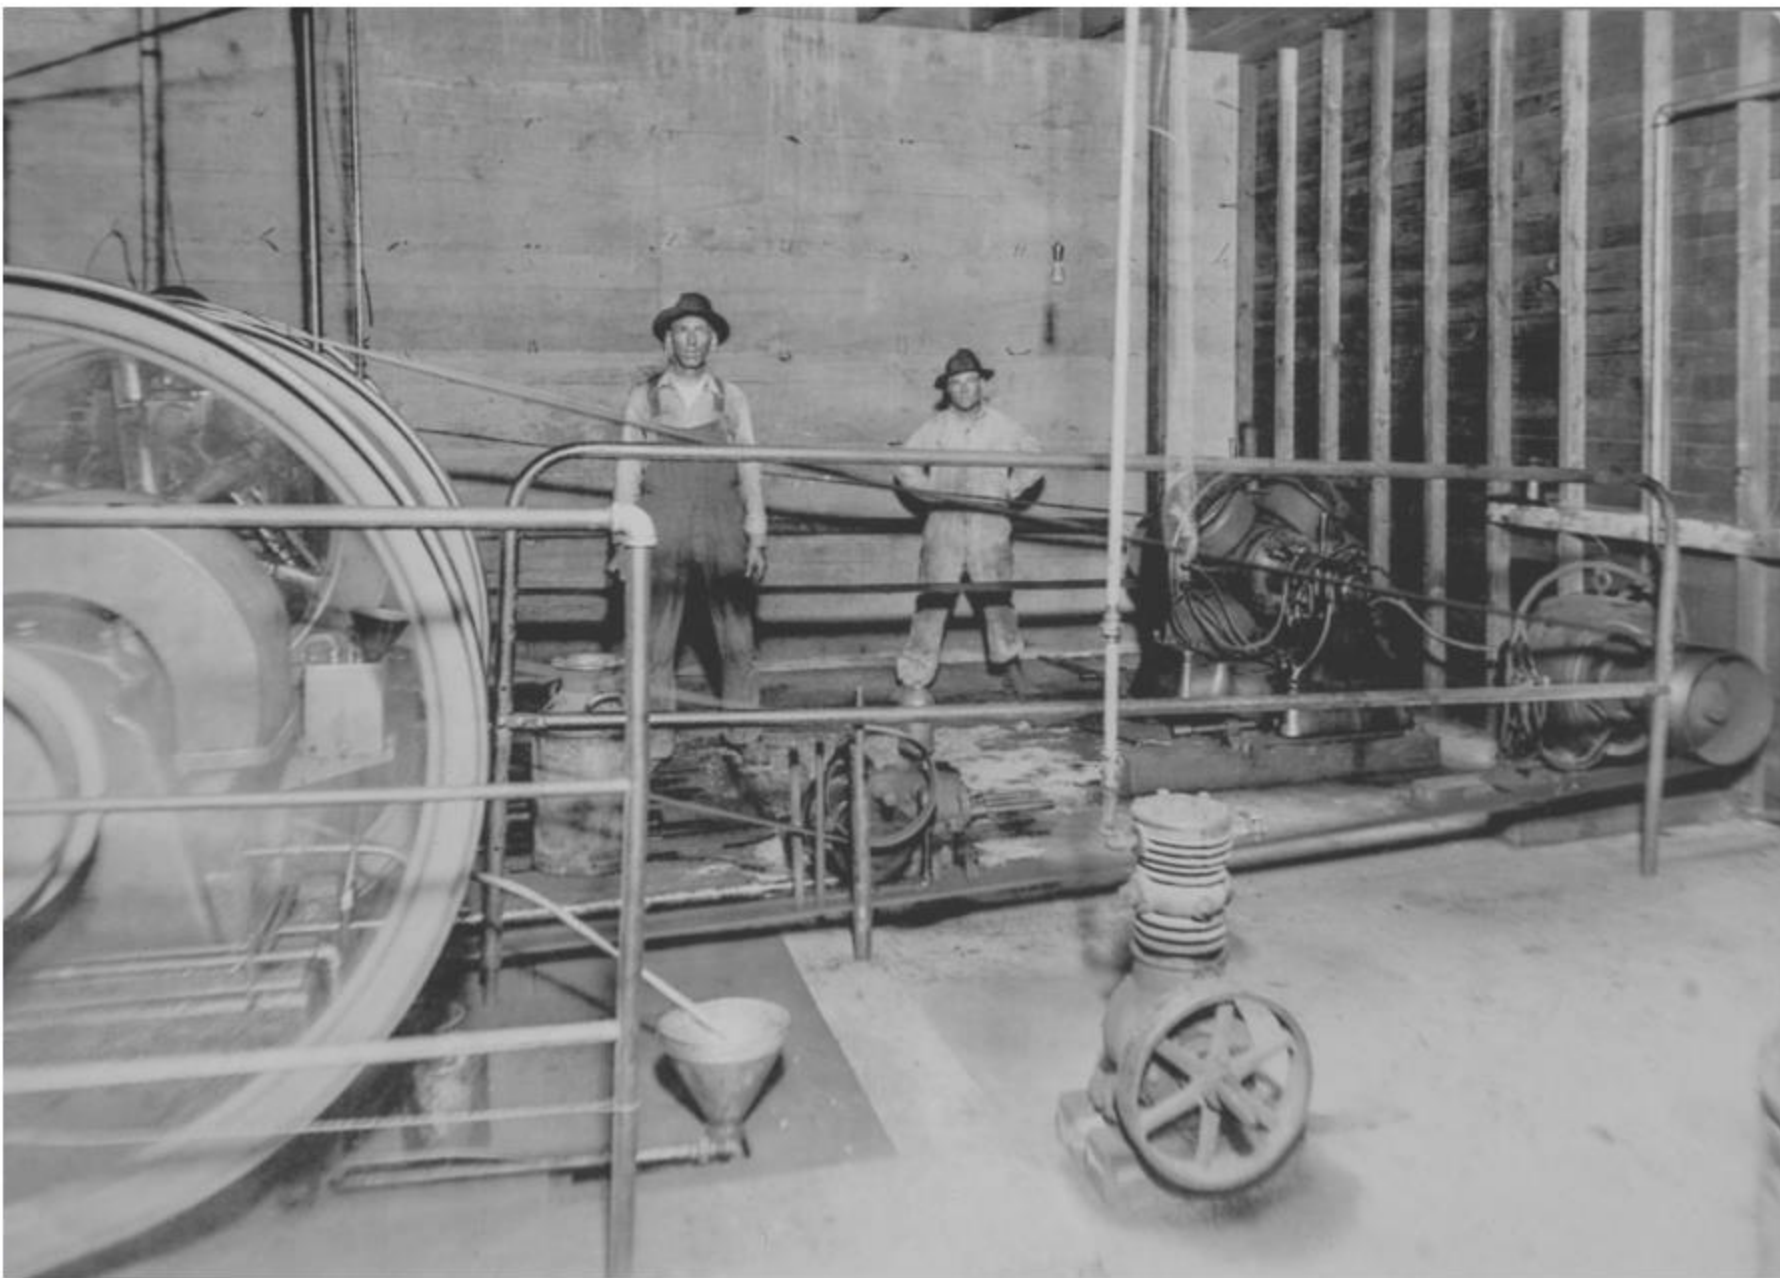

We wish to extend this invitation to call us at any time to serve your electrical needs. We look forward to building a mutually beneficial and lasting relationship.

Sincerely,

Mark Faucher
President

Heritage of Innovation. FOSHAY electric has over 105 years of energy generation and energy storage and has become a national Engineering, Procurement and Construction (EPC) electrical contracting leader working with residential, commercial, and utility clients on their electrical and energy storage needs.

FOSHAY electric is proud to announce the company’s newest division, FOSHAY solar energy, which specializes in providing cost- effective renewable energy solutions to its customers.

We Provide Full Service Solutions Customized to Meet Your Electrical Needs.

SPECIALTIES

With 105 years of energy generation and energy storage, we’ve developed our own set of specialties that set us apart from our competition.

DESIGN

We are a long established design-bid-build firm with the capacity to scale our services for any project. We provide the following design services:

FEASIBILITY STUDY

We complete an objective analysis to evaluate the inherent benefits and hurdles to ensure every project has the highest long term value for our clients.

FINANCIAL ANALYSIS

We assess the viability, stability and profitability of each project, modeling numerous scenarios to meet the highest returns for our clients and their business.

LEED COLLABORATION/GREEN BUILD

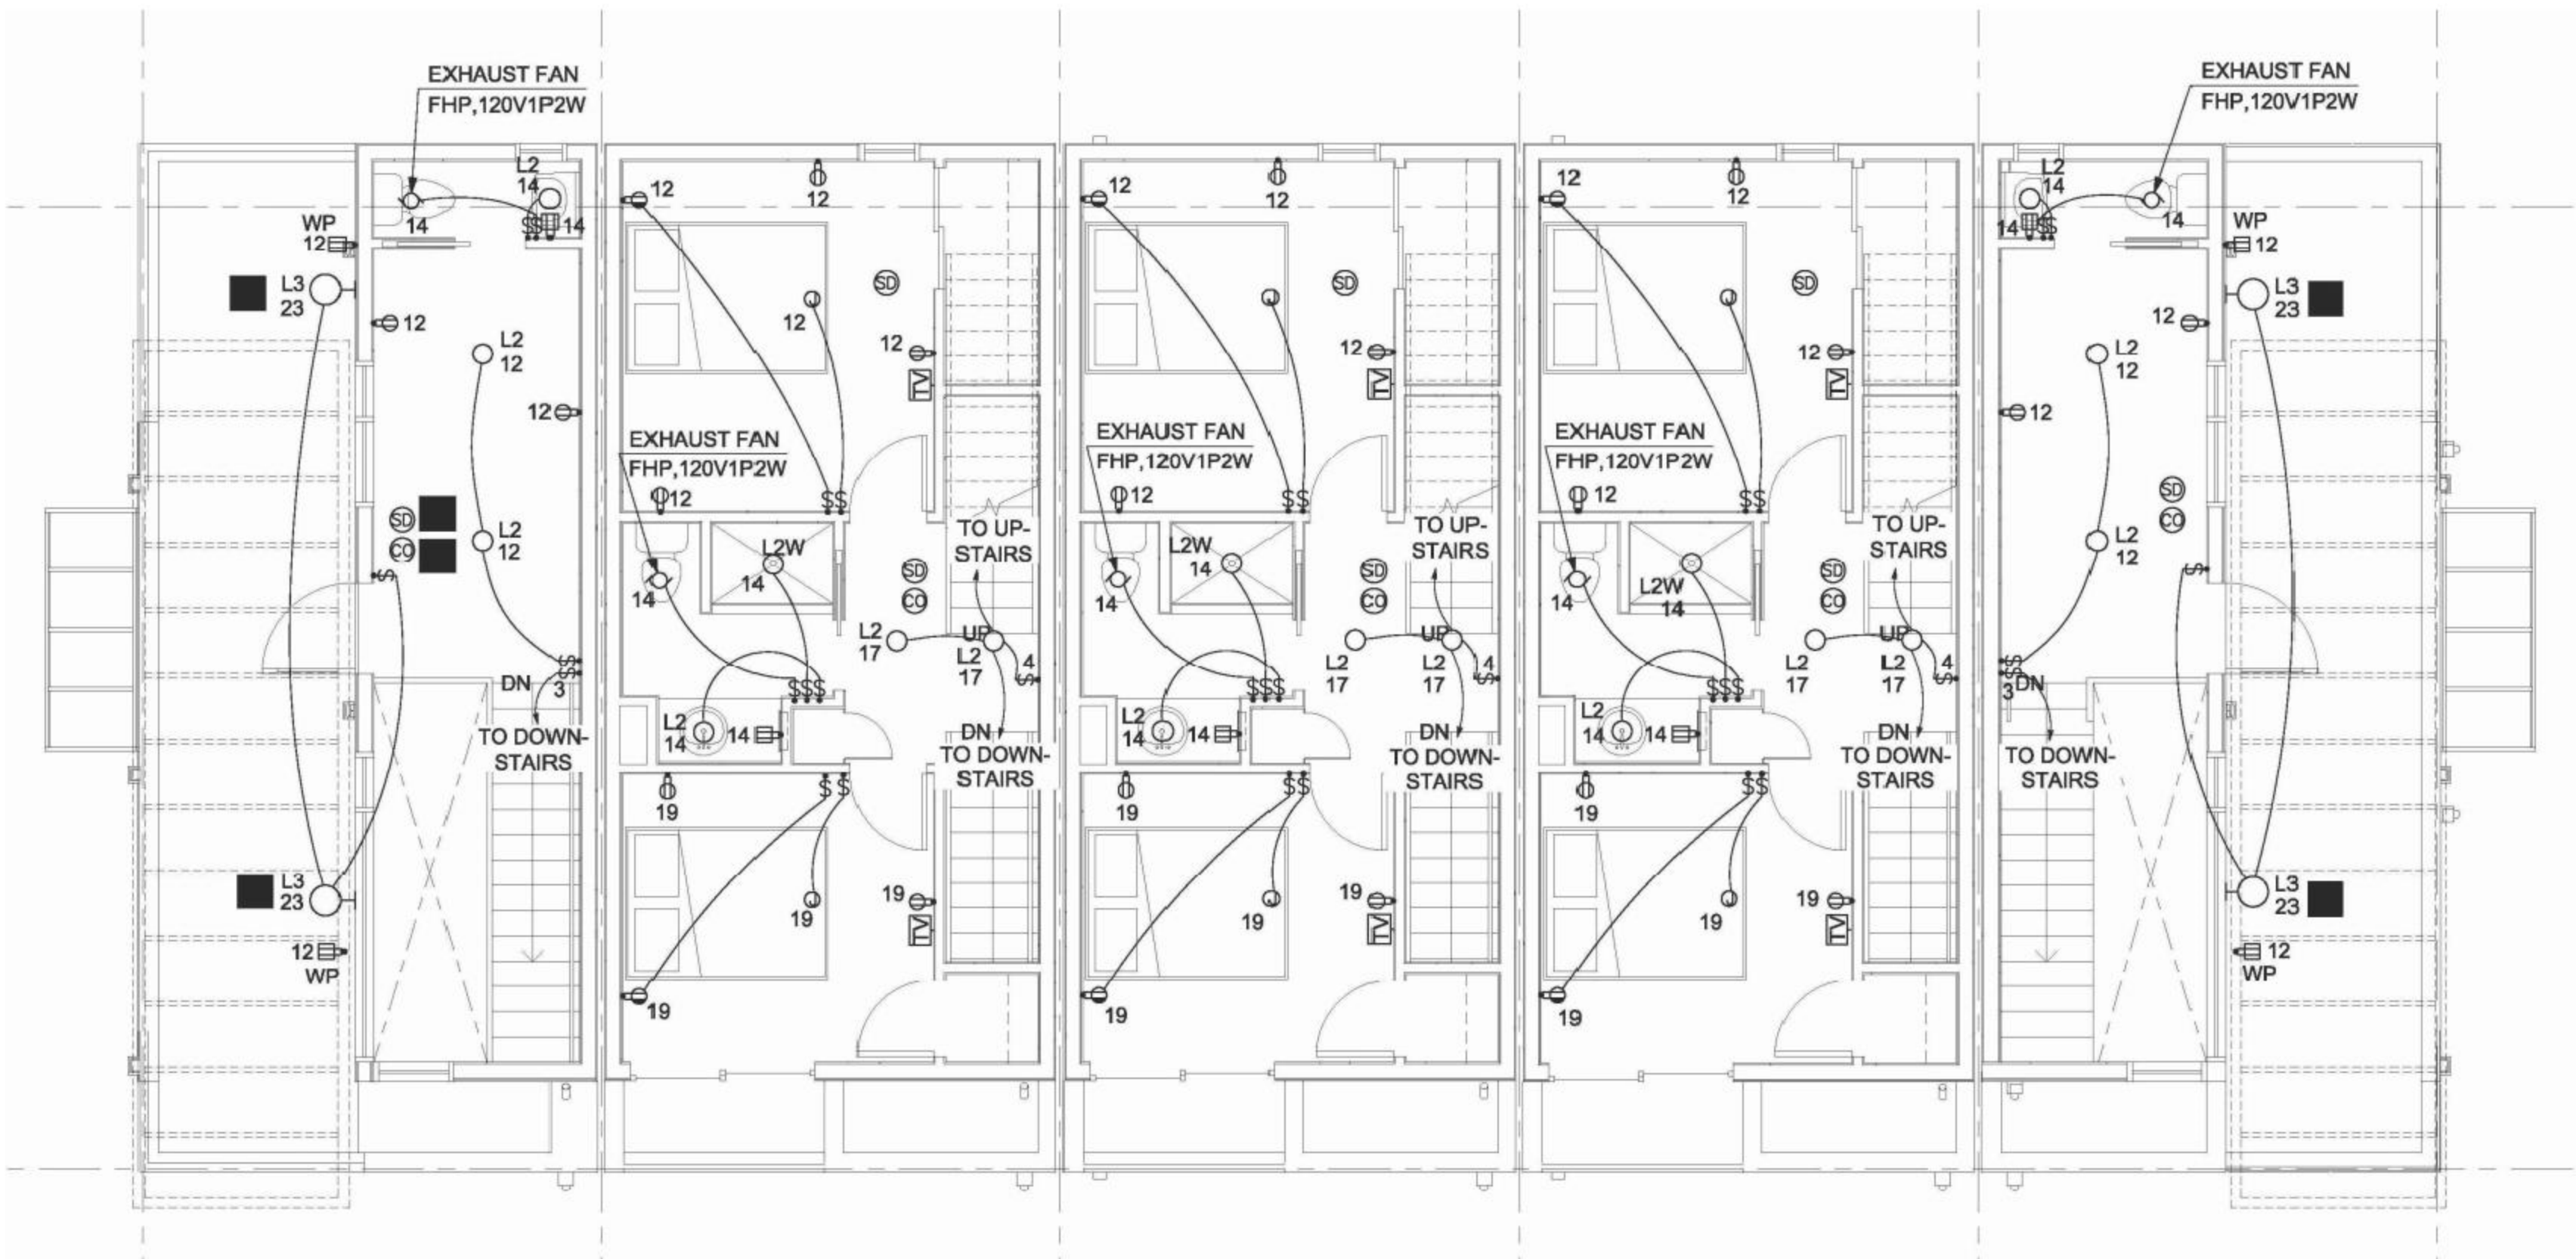

Obtaining LEED certification is challenging and complex. We can assist in delivering LEED certified green building projects to help your business demonstrate its commitment to sustainability and the community.

DESIGN/BUILD

We work closely with our clients through the entire project process from the design phase to the actual building to ensure all final products meet expectations.

PHOTOMETRICS

We understand providing optimal lighting is more than installing light fixtures and bulbs. We employ photometric techniques to determine ideal light fixture placement and light bulb wattage to perfectly illuminate any area.

ENGINEER

Our staff of professional engineers specialize in electrical system equipment and design to ensure that your project operates at the highest efficiency possible. Our engineering services encompass all aspects of the construction process from Design to Build and include the following:

ELECTRICAL DESIGN

Our team of in-house electrical engineers bring both experience and foresight to every system design. We pride ourselves on being in the forefront of progressive electrical system design.

PROJECT ESTIMATE

By leveraging our industry partnerships and understanding of technology, we offer quick and accurate estimates regardless of the application or size of the project.

PERMITTING & EQUIPMENT SPECS

With 105 years of experience in energy generation and energy storage, we know how to get your project permitted in a timely manner. We take pride in the relationships we have built across the industry and in local jurisdictions to ensure compliance and effective construction of all projects.

LIGHTING DESIGN

Our team is on the forefront of lighting design, employing the latest lighting technology to bring client ideas to reality. We closely monitor industry advances enabling clients to choose options that best suit their needs.

.CAD

Our engineers use state of the art Computer-Aided Drafting (CAD) programs to design and model project specifications. This modeling process allows our team to quickly vet ideas with clients and ensure on-time project completion.

CONSTRUCTION

Our staff of highly trained professionals has been instrumental in developing a proven record of quality performance during the construction process. Our construction services include the following:

UNDERGROUND

We are there on day and to install sweeps for utility connections and conduits for wires.

ROUGH INSTALL

Wiring and conduits perfectly sized to match your project requirements. From romex to MC cabling, we do it all.

FINISH TRIM

From switches to outlets, have the designer look you want. With so many choices, the possibilities are endless. We specialize in LED products and advanced lighting systems.

TV & TELEPHONE

We will give you the right connections. TV & Telephone outlets where you want them.

SOLAR ENERGY

We offer turnkey design-build services for solar energy projects. We install all mounting materials and components along with the electrical wiring of the entire energy system.

SERVICE

We pride ourselves on our reputation for superior service and integrity. We have the capacity to provide successful repairs of all sizes and give our customers the assurance that any electrical problem can be fixed with one phone call, at any hour, 7 days a week. Our electrical services include the following:

24/7 EMERGENCY SUPPORT

Our on-call electricians can assist in any emergency.

SURGE PROTECTION

Protect your important devices; computers, t.v.'s ect. with surge protection built right into your service panel.

EQUIPMENT UPGRADE

With new technologies advancing everyday, we can upgrade your electrical panel to accommodate these new devices so you can multi-task without interruptions. Adding air conditioner, pool or spa? We can help.

TROUBLESHOOTING & REPAIRS

Have an annoying electrical issue? Give us a call. Our fully trained electricians can solve your mystery.
